Education

University of Nottingham Ningbo China

BSc Hons Mathematics with Applied Mathematics 2024.9 – 2028.6 (*Expected*)

GPA: 4.0/4.0

Relevant Coursework: Probability Theory and Mathematical Statistics; Algebra; Stochastic Processes; Time Series Analysis; Partial and Ordinary Differential Equations; Mathematical Modeling

Technical Skills: Python; R; Stata; SPSS; MATLAB; SQL; LaTeX; Microsoft Excel; Microsoft Office; PowerPoint; Word; Canva; HTML

Language & Test Scores: CET-4; GRE: 328

Internship Experience

Digital Finance Intern – Wealth Advisory

2026.6 – 2026.8

SDIC Securities Co., Ltd., Chengdu, Sichuan

- Utilized Python to clean and engineer features from multi-source financial data, including A-share market data, financial statements, and public sentiment data; built a standardized factor database and assisted with the backtesting, performance evaluation, and effectiveness analysis of multi-factor stock selection models.
- Wealth Management Support: Assisted in identifying and organizing clients' wealth management needs and preparing asset allocation proposals and comprehensive financial service materials.
- Learning & Business Support: Developed foundational knowledge of securities products and business processes while supporting the daily operations of the branch.

Events & Marketing Office Intern

2025.6 – 2026.4

University of Nottingham Ningbo China – Centre for English Language Education, Ningbo, Zhejiang

- Supported the delivery of external-facing university programs with 100+ participants and assisted in organizing two faculty training events with 50+ participants.
- Coordinated guest reception and participant arrangements; managed end-to-end expense collection, reimbursement documentation review, and submission.
- Prepared event materials and supported on-site operations, including guest reception, campus tours, and logistical arrangements. Served as an event host for relevant activities.
- Contributed to the Centre's official WeChat account, including article writing, content editing, and content management.

Academic Experience

Mathematical Modeling of the Human Cardiopulmonary System

2026.1-2026.8

University of Nottingham Ningbo China, Ningbo, Zhejiang

- Joined the undergraduate research team led by Professor Mainul Haque; reviewed ODE-based cardiopulmonary models for COVID-19/ARDS, focusing on respiratory–cardiovascular coupling, key parameters, and clinical applications.
- Investigated the effects of mechanical ventilation (PEEP) on cardiopulmonary indicators and model validation; presented research findings to the team.

Mathematical Contest in Modeling (MCM)

2026.1-2026.2

- Selected for the preparatory training program and represented the university in the International Mathematical Contest in Modeling.
- Developed a multi-objective optimization model for space elevator and rocket transportation, incorporating learning curves, time value of money, and the rocket equation; completed an English research paper.

China Undergraduate Mathematical Contest in Modeling (CUMCM)

2025.9

- Received a University Competition Award; developed a mathematical model for SiC epitaxial layer thickness estimation using infrared spectroscopy.
- Responsible for spectral data processing and algorithm implementation, applying filtering, FFT, least-squares fitting, Cauchy dispersion, and Drude models.

Portfolio Management & Financial Risk Modeling track

2025.3-2026.5

2025 International Innovative Talents Science Training Program

- Completed Capital Markets taught by Professor Alexei Chekhlov (Columbia University) with a final grade of 93.3/100; studied Markowitz portfolio optimization, CAPM, APT, EMH, and behavioral finance.
- Applied Excel Solver to asset allocation and risk management tasks, covering portfolio construction, index models, and ESG investing.

•

Extracurricular Activities

Innovation & Entrepreneurship Experience

Lab Product Development

2025.3-2025.4

University of Nottingham Ningbo China Business School, Shanghai & Ningbo

- Participated in the Lab program organized by the University of Nottingham Ningbo China Business School.
- Visited miHoYo's Shanghai headquarters to gain insights into corporate operations, innovation culture, and industry practices.
- Collaborated with a team to design an innovative gaming controller, conducted market research and analysis, and delivered a final project presentation.
